✔ After this step, OST Splitter setup will start the process of uninstalling the software from the computer system.

✔ After this OST Splitter will be successfully uninstalled from the computer system. Click on OK to close the window.

Uninstall Using Control Panel

Another alternative described here for software uninstall is through Windows Control Panel which holds and maintains all system settings. This alternative is described here just for sake of completeness. You can easily skip this step if done with prior uninstall process.

✔ Click Start and look for Control Panel in start menu appears before you. Find Add and Remove Programs within Control Panel. Add and Remove Program generates comprehensive listing of all binaries presently installed on Windows. Find out SysTools OST Splitter and double click on it to start with its uninstall procedures.

✔ Software prompts you either you like to remove OST Splitter and all of its related components. Go for Yes.

✔ Click OK to message describing successful uninstall of OST Splitter.
